

Limestone

La bellezza della pietra calcarea nata dai fondali marini e lavorata nel corso del tempo dall'acqua. Dalla colorazione profonda e dalle piccole imperfezioni che la rendono unica. Peculiarità di una pietra naturale che vengono magistralmente riprodotte in questa nuova proposta.

The beauty of limestone, sourced from the seabed where it has been shaped over time by water, with its rich coloring and small imperfections making it a unique and timeless material, has been masterfully recreated in this new collection.

Die Schönheit des Kalksteins, der sich im Meeresboden bildet und im Laufe der Zeit vom Wasser geformt wird, mit seinen tiefen Farben und den kleinen Unvollkommenheiten, die ihn einzigartig machen. Besonderheiten eines Natursteins, die in diesem neuen Vorschlag meisterhaft reproduziert werden.

La beauté de la pierre calcaire, née des fonds marins et travaillée au fil du temps par l'eau, la couleur profonde et les petites imperfections qui la rendent unique. Caractéristiques d'une pierre naturelle qui sont magistralement reproduites dans cette nouvelle proposition.

La struttura Ribbed rivela i dettagli di superficie irregolare tipici della pietra a spacco.

The ribbed structure reveals the typical details and irregular surface characteristic of split stone.

Die gerippte Struktur offenbart Details und die unregelmäßige Oberfläche die im Bruchstein typisch sind.

La structure nervurée révèle les détails typiques et la surface irrégulière caractéristique de la pierre de taille.
